

Again, we stress our neutrality on which State routes are designated. We are reassured that the CHP ~~are~~ "contemplating additional routing considerations such as physical constraints of roadways, inadequate shoulders, turning radius . . ." We would like to be reassured that on any State highway that these factors are given top priority, ~~that~~ the infrastructure is considered to be adequate before designation, and if not, then how ~~are~~ the impacts ~~going to be mitigated and improvements financed?~~.

Please feel free to give me a call if you would like to discuss any of our comments. You can reach me at (619) 872-0604.

Sincerely,

Lewis K. Wood

~~KENNETH DEBOY,~~
~~Deputy District Director~~
~~of Transportation Planning & Project Development~~
